**XXXVII** ... (Sea freight)

(AK: all prices for a kastrensis modius, (in k. mo. uno, 17,51 litre); all entries from Lauffer (1971), entry 32-37 and 43-45 from Crawford and Reynolds (1979), 185-186.

Some ports have been inferred on the basis of Seidel, W., 2013: Explaining the maritime freight charges in Diocletian's Price Edict , version 1.0, Princeton/Stanford Working Papers in Classics.

Seidel argues, that as a rule of thumb one day of sailing was 1 denarius for one k. mod. (Seidel 2013, 5-6).

1 The following sea rates must not be exceeded for transport between the following regions in different provinces.
